

GET THE FACTS.

STAY SAFE AFTER BEING VACCINATED.
PROTECT YOUR COMMUNITY.

You are not fully protected from COVID-19 until **two weeks** after your last shot!

- If you got the **two-shot vaccine**, you must wait **2 weeks** after your second shot.
- If you got the vaccine that only needs **one shot**, you must wait **2 weeks** after your shot.

STAY SAFE AFTER BEING VACCINATED

Experts don't know how long the vaccine will protect you from COVID-19 or if you can still spread COVID-19 to others after being vaccinated. Even after getting the vaccine, continue to:

Wear a mask.

Practice social distancing.

Avoid gatherings with many people.

Wash your hands frequently.

Disinfect high-touch areas.

Even if you are fully vaccinated, get tested for COVID-19 right away if:

You have been around **someone with COVID-19** and start to feel ill. Also stay home and away from others.

You live with **many people** and have been around **someone with COVID-19**. Even if you do not feel ill, **get tested**. Also stay home and away from others.

NORTHWEST

A PROGRAM OF
Lutheran Community Services Northwest

TWO WEEKS AFTER YOU HAVE BEEN FULLY VACCINATED, YOU CAN:

Be indoors with others who have been **fully vaccinated** without wearing a mask.

Be indoors with others from **one other home** who have **not been vaccinated** without wearing a mask.

However, you should **avoid visiting** people who are at a **high risk of getting seriously ill** from COVID-19 to protect them. **If you must visit them, you should still try to protect them by wearing a mask, staying 6 feet away and washing your hands.**

People may be at high-risk if they:

- Have other illnesses like cancer, diabetes or high blood pressure
- Are very overweight
- Smoke
- Are pregnant
- Are over age 65

WE'RE STILL LEARNING

- How long vaccines protect people from getting COVID-19.
- Whether vaccines keep people from spreading the disease.
- How effective vaccines protect against new types of COVID-19.

Be safe while traveling

When you travel, protect yourself and others by:

- Wearing a mask over your nose and mouth when in public.
- Avoiding crowds and stay at least 6 feet/2 meters from anyone you did not travel with.
- Washing your hands often.

Be safe while traveling in the United States

- You do not need to get tested before you travel.
- When you return, you do not need to get tested or stay away from others unless you feel ill.

Be safe when traveling internationally

- Check with your airline and local health officials where you are going to see if you need to get tested or stay away from others before your trip.
- Get tested no more than 3 days before you come back to the U.S.
- After your trip:
 - Get tested within 3-5 days.
 - Stay home and away from others if you feel ill.
 - Check with local health officials to see if there is anything else you need to do.
